INTRODUCTION

Entering the competitive flat panel world in January of 2007, the Sharp LC-46D92U is Sharp's top of the line LCD TV. The D92 samsung tv 46 series includes only a 46" and a 52" model. This is a gorgeous TV and is a serious upgrade from Sharp's D62 series, which is also a very strong product.

Sharp is as cutting edge as manufacturer's come in the video flat panel (especially LCD) world. They focus attention on LCD products and improving particular (weakness) aspects of LCD products such as response rate time, black levels, and viewing angle and the end products show it. Samsung, Sony, and LG samsung tv are all LCD competitors as well as some burgeoning 2nd tier manufacturers. Sharp is working on the introduction of the worlds largest LCD at 108".
